Description	A six-sided, internally threaded fastener that is 30% to 45% thicker than a same-sized heavy hex nut.
Applications / Advantages	Primarily used in automotives, other ground vehicles and industrial equipment that require additional wrenching area.
Material	**Nuts**: Shall be made from a low carbon steel that conforms to the following chemical composition: *Carbon*: 0.47% max.; *Phosphorous*: 0.12% max.; *Sulfur*: 0.15% max. **Washers**: SAE 1050 - 1065 carbon steel, fabricated and heat-treated
Hardness	1/4 thru 5/8” diameter: 24 - 32 HRC Over 5/8 thru 1” diameter: 26 - 34 HRC
Plating	Nuts are usually supplied with a zinc or black oxide finish. See Appendix-A for more information.
